

RAL Color Program

Super Durable TGIC-Free Powder Coatings

FEATURES AND BENEFITS

Program Details

Sherwin Williams RAL Color Program gives metal finishers leading technology in vibrant RAL Colors, resulting in consistent color and long-lasting finishes. Our initial offering, *Super Durable TGIC-Free Polyester Powder Coating*, is available in 188 RAL Colors. Fast turnaround times and flexible ordering quantities make it easier for metal finishers to meet tight deadlines and satisfy discriminating customers.

- 188 RAL Colors.
- Available in 25-pound quantities.
- Average lead time of 3-8 days, depending on your location.

RAL Color & Sherwin-Williams Expertise

RAL Colors are European industrial color standards recognized around the globe. With Sherwin Williams ISO Certified manufacturing processes, metal finishers can count on consistent batch-to-batch RAL Color and quality. Additional liquid coating qualities (Polyurethane Enamels, Air Dry Enamels, Water Base Enamels) can be custom ordered in many RAL Colors, providing a variety of coating solutions.

For over 125 years, Sherwin Williams has been perfecting the art and science of color. We understand the value color brings to your finished products and we are committed to giving you consistent performance. With Chemical Coating facilities strategically located in North America and Asia, Sherwin Williams can satisfy your RAL custom color matching and "just in time" delivery requirements.
